

Report on Agreed-Upon Review Procedures

Classification review · Altai Metals Holding B.V.

Entity Altai Metals Holding B.V.

Account ACC-7604

Report number AR-2025-0106

Issued by Amstel Audit Partners B.V.

This report records the outcome of the classification review procedures performed on selected transactions of the Entity for the period. It is issued to the Entity's finance function and is referred to in the notes to the financial statements. Determinations recorded below are the auditor's final position for covenant-testing purposes.

1. Scope of procedures

Procedures covered the transaction population selected during the interim and final visits. They comprised inspection of supporting documentation, enquiry of finance personnel responsible for the original posting, and comparison against the Entity's stated accounting policies. The procedures do not constitute an audit or a review conducted in accordance with International Standards on Auditing, and accordingly no assurance opinion is expressed.

2. Basis of determination

Where the documentation supporting a posting was inconsistent with the classification originally applied, the classification has been restated to the caption the supporting documentation indicates. Where the evidence was inconclusive, the original classification stands and is not reported here.

3. Status of this report

This report supersedes any interim schedule circulated during fieldwork. It is retained in the audit file and released to the Entity; it is not distributed to third parties other than as required under the Entity's financing arrangements.

4. Foreign-exchange conversion examined

Non-USD amounts are converted for covenant testing at the rate implicit in the actual settlement of the period's transactions; no separate table of rates is maintained.

(4.1) Settlement with Donau Metallhandel GmbH: an invoice of 57,338.50 EUR was settled by a payment of \$64,322.63, stated net of a correspondent bank charge of \$1,043.26, which does not form part of the converted amount.
