

Notes to the Financial Statements

Altai Metals Holding B.V. · Year ended 31 December 2025

These notes accompany the management accounts for the financial year 2025 and should be read together with the loan covenant schedule. Amounts are stated in US dollars unless otherwise noted.

Note 1 — Basis of Preparation

These financial statements present the accounts of Altai Metals Holding B.V. and have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board. They are prepared on the historical cost basis, except for those financial instruments that are measured at fair value, and on a going-concern basis, the directors having a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. The accounting policies set out below have been applied consistently to all periods presented.

Note 2 — Significant Accounting Policies

The preparation of these statements requires the consistent application of recognition and measurement policies across reporting periods. Where a new or amended Standard has become effective during the year, its adoption has not had a material effect on the amounts reported. Comparative information has been reclassified where necessary to conform with the presentation adopted in the current year, and such reclassification does not affect previously reported results or equity.

Note 3 — Revenue Recognition

Revenue is recognised in accordance with IFRS 15, Revenue from Contracts with Customers, when control of the promised goods or services transfers to the customer, in an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company identifies the performance obligations in each contract, allocates the transaction price to those obligations, and recognises revenue as each obligation is satisfied, either over time or at a point in time, according to the substance of the arrangement.

Note 4 — Property, Plant and Equipment

Items of property, plant and equipment are stated at cost less accumulated depreciation and any accumulated impairment losses. Depreciation is charged to profit or loss on a straight-line basis over the estimated useful lives of each component, which are reviewed at each reporting date and adjusted prospectively if expectations differ from previous estimates. The carrying amount of an asset is written

down immediately to its recoverable amount when the former exceeds the latter, and gains or losses on disposal are determined by comparing proceeds with carrying amount.

Note 5 — Foreign Currency Translation

Transactions denominated in currencies other than the functional currency are recorded at the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities so denominated are retranslated at the closing rate at the reporting date, and the resulting exchange differences are recognised in profit or loss. Non-monetary items measured at historical cost are not retranslated. The rates applied in the ordinary course of preparation are those published by the National Bank for the relevant settlement dates.

Note 6 — Related Party Transactions

In the ordinary course of business the Company enters into transactions with related parties, including entities under common control and key management personnel, which are disclosed in accordance with IAS 24, Related Party Disclosures. Such transactions are conducted on terms that the directors consider to be equivalent to those prevailing in arm's-length dealings, and outstanding balances at the reporting date are unsecured and settled in cash. No guarantees have been given or received in respect of these balances.

Note 7 — Financial Instruments and Risk Management

Financial assets and liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument and are classified and measured in accordance with IFRS 9. The Company is exposed to credit risk, liquidity risk and market risk in the normal course of its activities. Credit risk is managed through counterparty assessment and the monitoring of receivable ageing; liquidity risk is managed by maintaining adequate banking facilities and by forecasting cash requirements; and market risk is managed by monitoring exposure to movements in interest rates and exchange rates.

COVENANT COMPLIANCE ADDENDUM

The following disclosures supplement the notes above and are prepared by the auditor solely for covenant-testing purposes under the Credit Agreement.

Note 8 — Foreign Exchange

The foreign-exchange conversion applied for covenant-testing purposes was examined in the course of the procedures. The determinations on this matter are set out in report on agreed-upon review procedures No. AR-2025-0106 and are not repeated here.

No reclassifications were required for the covenant period.
